

PubPro for Publication Management & Planning

Publications shouldn't be a compliance risk or a logistical nightmare.

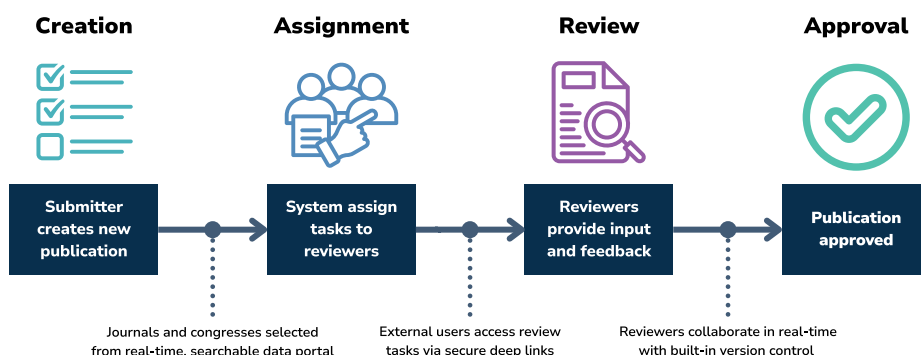

Teams without dedicated publication software often rely on a patchwork of spreadsheets, email chains, and shared drives. A manual approach wastes time, increases the risk of errors, and makes proving compliance difficult.

For teams that do rely on software, the challenge shifts: costly configurations, rigid workflows, and clunky user interfaces that make even the most basic tasks feel like uphill battles.

Work smarter and stay audit-ready with PubPro

PubPro replaces manual tools and clunky platforms with a configurable solution that automates the publication process.

Key features

Automated reviewer assignments

Automatically route tasks to the right reviewers and provide role-specific dashboards to keep work moving.

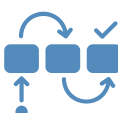

Journals and congresses portal

Get publications to the right place at the right time with real-time access to journals and congresses data.

External reviewer access

Grant external users access to review publications via secure deep links — no login required.

Publication planning dashboard

Visualize publication milestones and track progress with a centralized publication planning roadmap.

No-code configuration

Tailor workflows, user roles, and review logic to your exact needs — all without custom development.

Built-in reporting and analytics

Generate custom reports to monitor workflows, track compliance metrics, and maintain full audit trails.
